My Cars & the Restoration of My 1969 MG Midget

December 19, 2021

First Car, \$50 1948 Plymouth

**Second Car, \$25 - 1951 Studebaker
from Junk Yard
(Not The One Shown Above)**

**Third Car, 1970 AMX
Purchased New**

Other Rich Hall Old Cars

1953 Nash Ambassador

1929 Essex

1954 Ford

1969 MG Midget

Installing Clutch on Kraus
Drive

**Pretty Rough!!
At this Point It Might Have Been a Good
Idea to Scrap it**

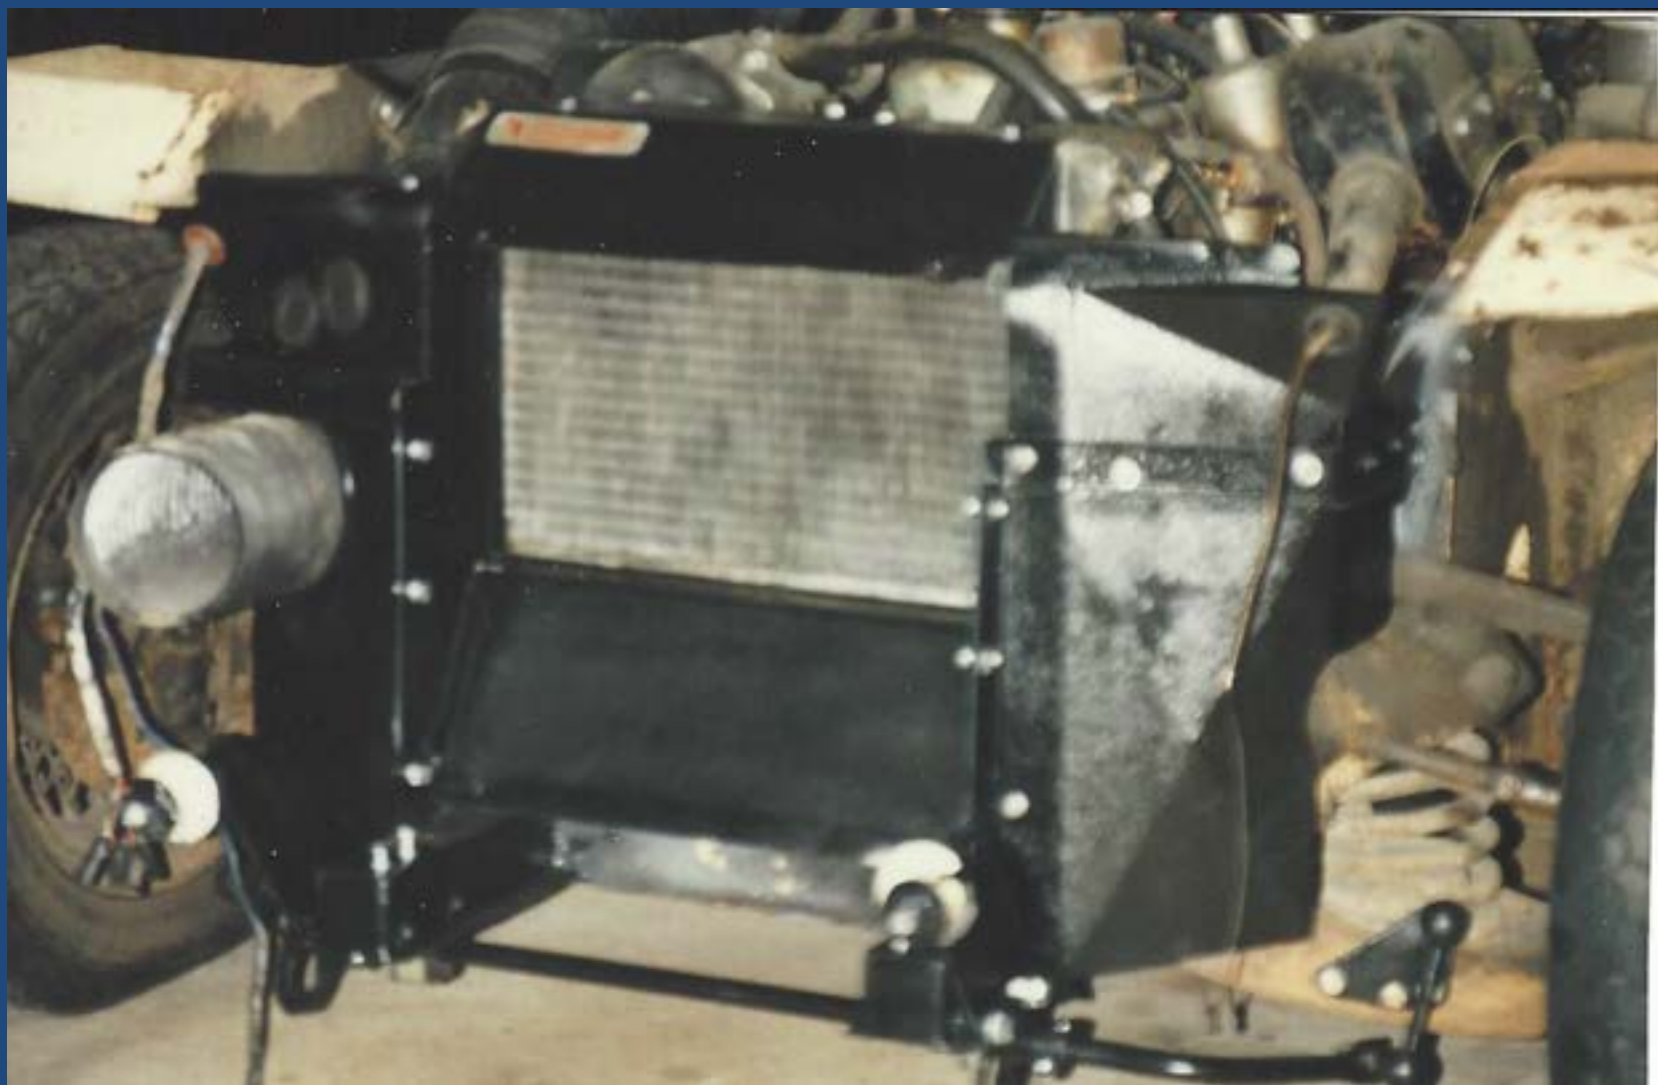

The Black Material is POR-15

POR-15 Inc. is an industry leader in rust-preventive paints—paints the company calls “practically indestructible.” Ideal for automotive restoration jobs, POR-15 non-porous coating provides a permanent moisture seal to prevent corrosion. According to POR-15, the secret is in the curing process. While most paints dry through evaporation, POR-15 actually dries faster when moisture is present. POR-15 offers rust preventive paints, chassis coat black paint, Metal-Ready surface treatment, Marine-Clean, fuel tank repair kits, heat-resistant paints and solvents.

At this Point, I had to Move from PA to SC, so I attached as Many Loose Parts as Possible

**Now in
Simpsonville,
SC**
